

MOBILITY IN BIRMINGHAM

LTT activities at Cromwell Primary School

As Yalova Team we attended the mobility in Birmingham, UK on 19th-26th of January for our Erasmus + project about gender equality which name is "We all equal one".

I would like to say that this mobility has broadened our horizon because we were informed about the education system of Cromwell Primary School and we had cultural trip around the Birmingham city.

First day of the meeting we visited Think Tank. Think Tank is a science museum that offers an enlightenment and fun for both the students and teachers. While we are visiting this place, we realized that children can develop their skills and understanding through fun and play in this science museum.

On second day, we had cultural trip around the Birmingham city. We visited Birmingham Museum and Art Gallery, Birmingham Central Library and went on a Canal Trip.

On Third day of meeting, we visited Cromwell Primary School and Bordesley Village Primary school. We were informed about the class and education system by our coordinator. We attended a class and we had a chance to observe how to teach Spanish to the students. We also attended a drama class. I and my colleagues were most impressed by the school education system because all the students were listening to the subject very carefully. Teachers were able to get all the kids to focus on the lesson. So, we learned new ways and methods.

On the fourth day, we watched a traditional British pantomime in school. It was funny and educational. The Last day of the meeting we shared of our experiences and we had coordinator meeting for the planning future meetings. Afterwards we had certificate ceremony.

For this mobility I and my colleagues thank to our coordinator Johanna, Nick, principal of the school and all the staff for their hospitality and kindness.

For me and my colleagues, it was more educational experience and also we learned how can we teach gender equality for early ages students in the schools.
